

Node-RED:

1. First Overview of Flows and Nodes

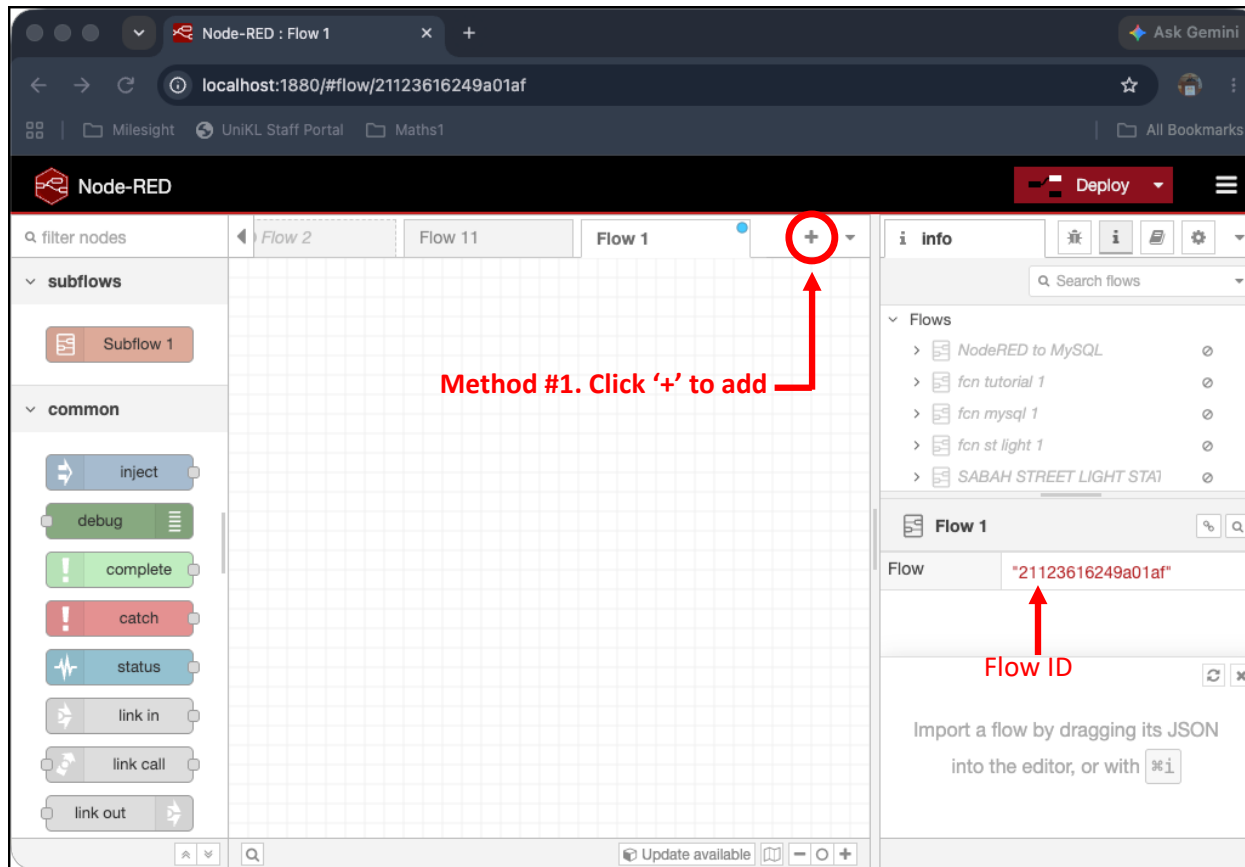

By the end of this section, students should be able to:

- i. Add a new flow in the Node-RED workspace
- ii. Delete an existing flow from the workspace
- iii. Deploy a flow to activate and apply changes
- iv. Navigate the Node-RED main menu and identify its functions
- v. Import an existing flow using JSON code or a file
- vi. Export a flow for backup or sharing
- vii. Manage the Node-RED palette to install, update, and remove nodes.

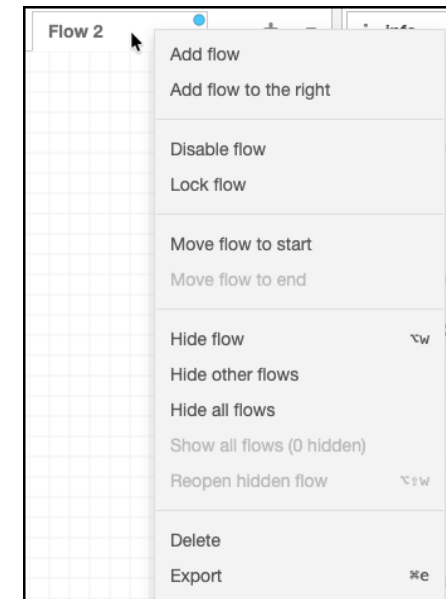

**UniKL BMI Comm Tech Section
@ TVET MARA - MJII
SEPT 2026**

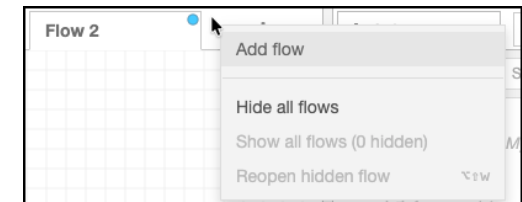

i. How to add new Flow

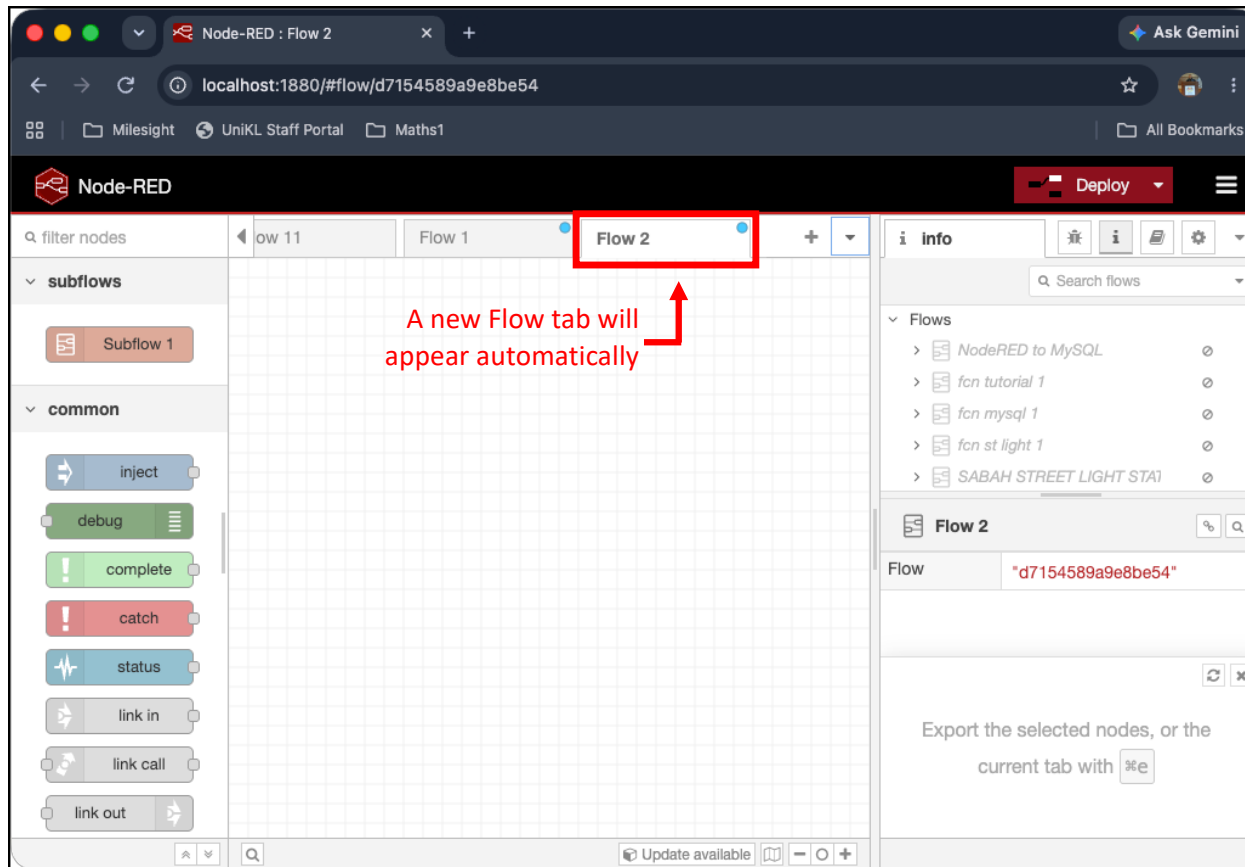

Method #2

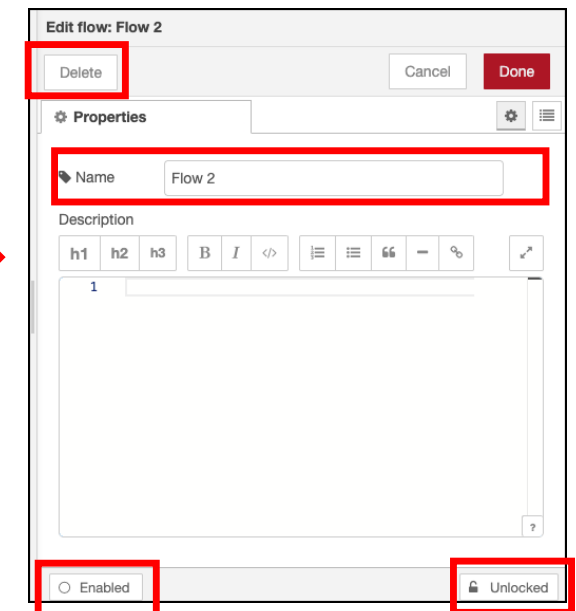

Method #3

ii. How to delete a Flow

1. Double click the Flow tab to change its properties
2. Press Delete button to delete the Flow

Enabled → active and running
Disabled → flow stopped without deleting it

Unlocked → prohibited from editing

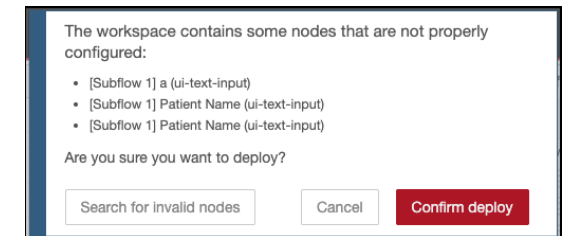

iii. Deploy a Flow

Click Deploy button to apply & activate the changes made

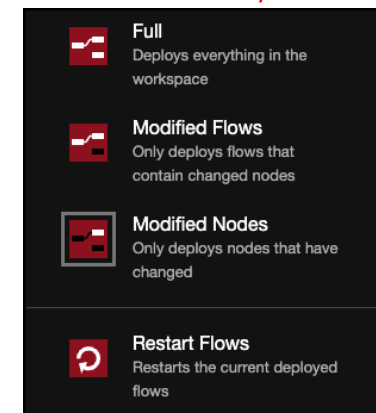

Blue dot (●): Indicates that the flow has not yet been deployed after changes were made.

The screenshot shows the Node-RED web interface in a browser. The top bar has a 'Deploy' button highlighted with a red box. A red arrow points from this button to a dialog box on the right. The main workspace shows 'Flow 1' with a blue dot next to its name, indicating it is not deployed. The left sidebar shows various nodes like 'inject', 'debug', 'complete', 'catch', 'status', 'link in', 'link call', and 'link out'. The right sidebar shows a list of flows and the details for 'Flow 2'.

Double Click other than arrow down key will produce the followings box

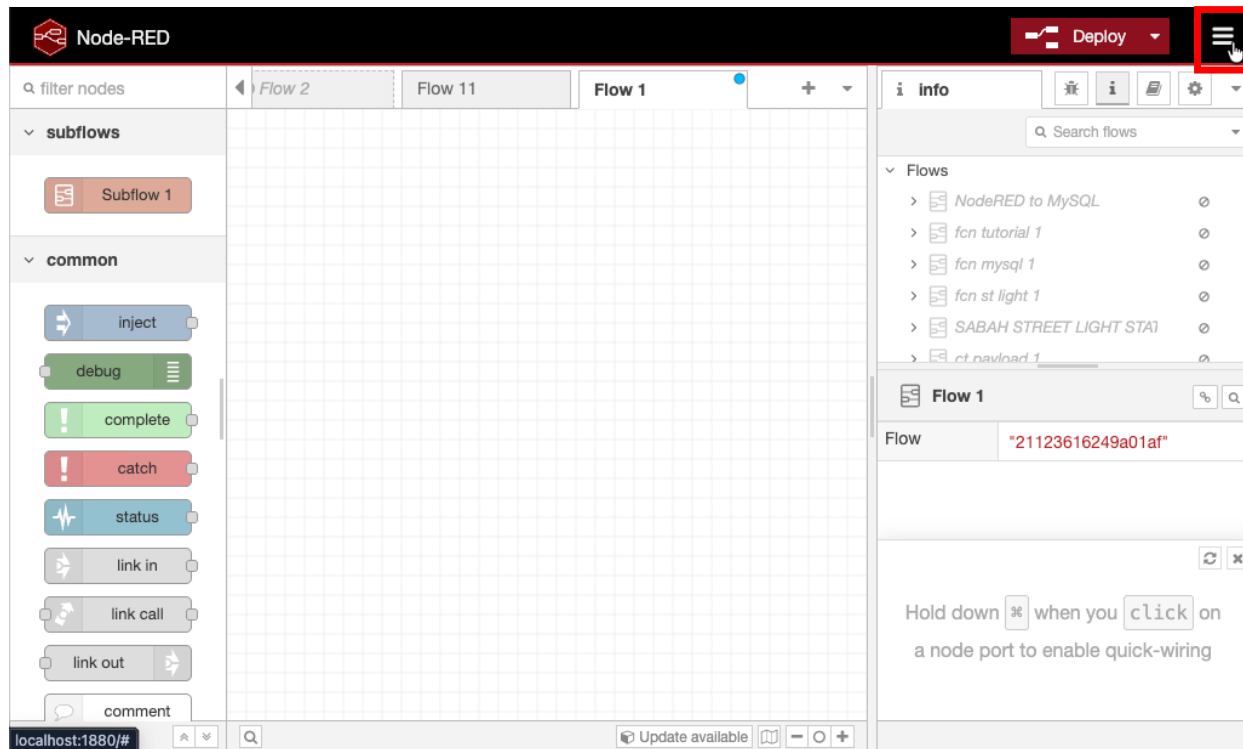

The selection appears when you click the arrow key

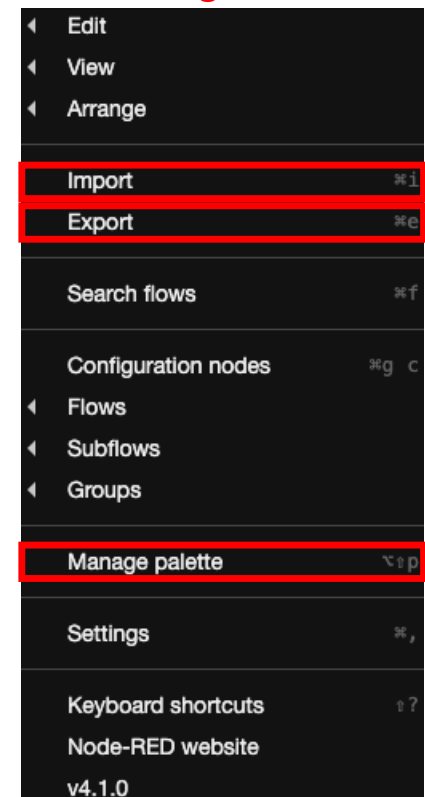

Choose deploy option accordingly

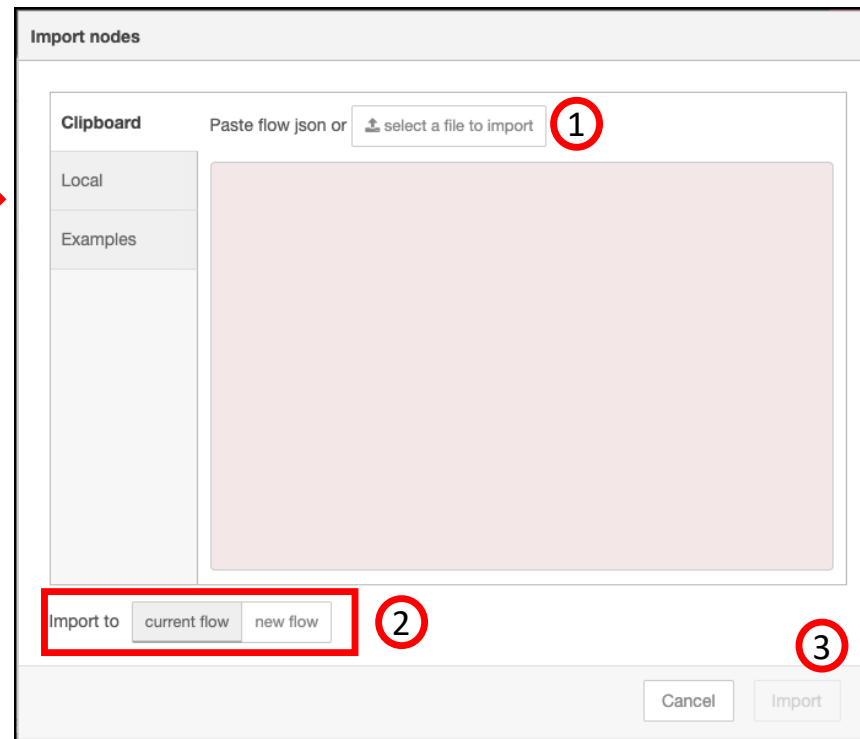

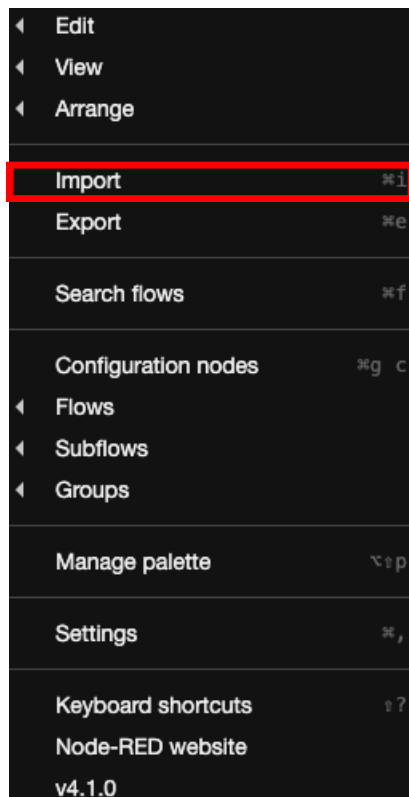

iv. Behind the Main Menu

Menu: Access to additional options and settings

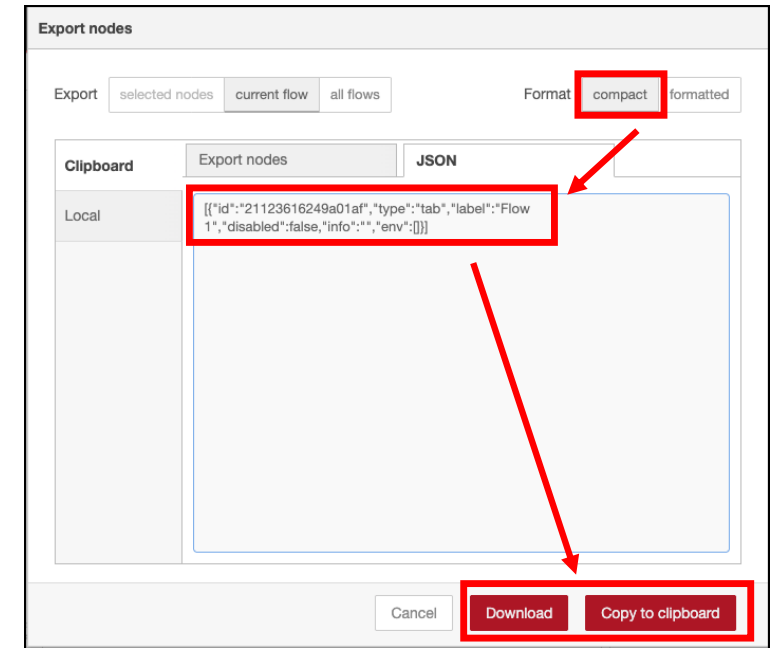

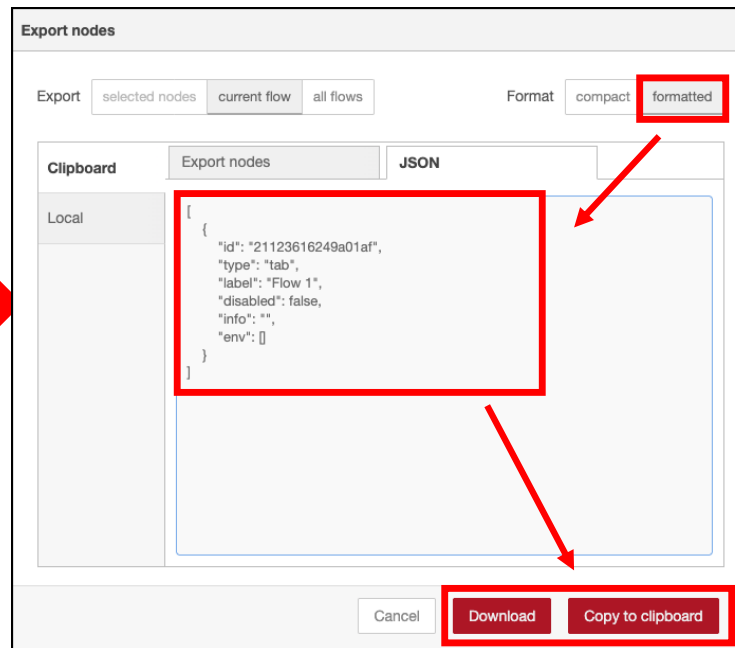

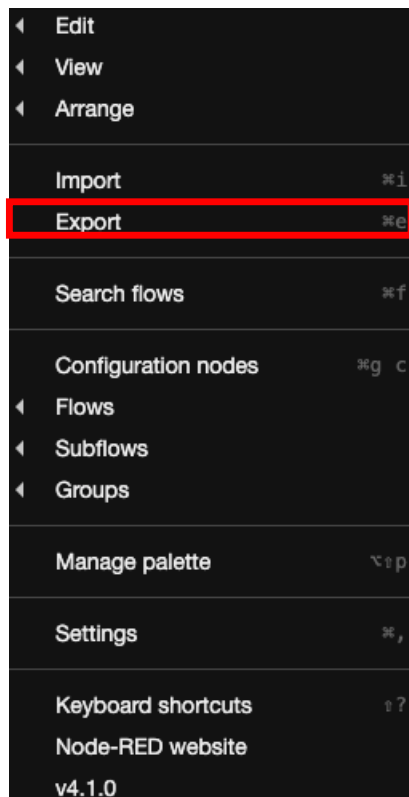

iv. Import menu

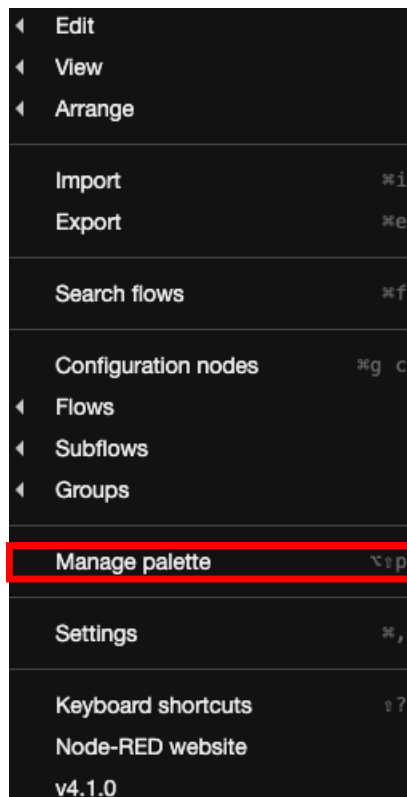

-Brings flows into Node-RED
-Adds an existing Node-RED flow into the workspace using JSON code or a flow file.

iv. Export menu

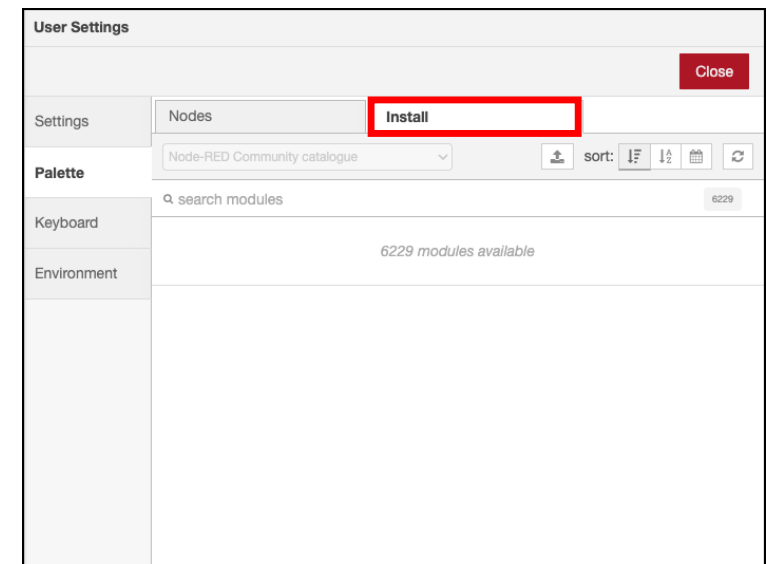

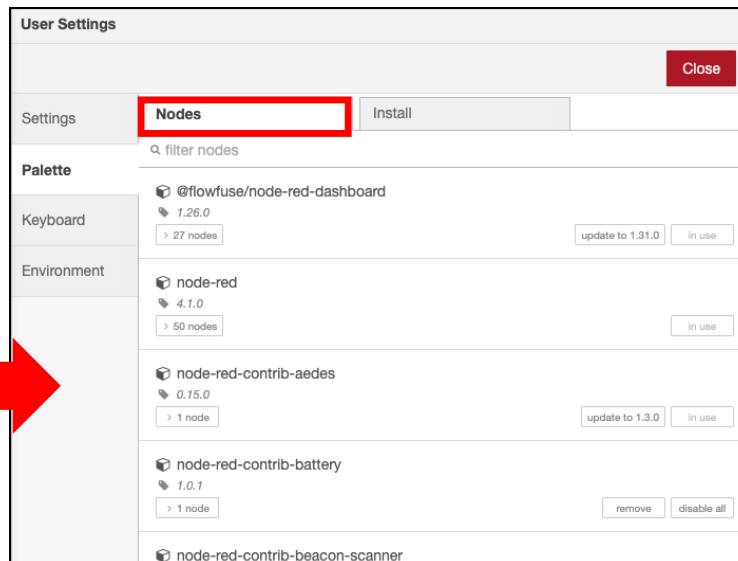

- Save or share flows
- Converts selected nodes or flows into JSON format that can be copied, saved, or shared with others
- Download: Filename is flows.json
- Copy to clipboard: can paste in any files or email

iv. Export menu

- Manage Node-RED nodes
- Allows you to install, remove, update, and view additional nodes/packages available in Node-RED

END
